SERVICES AVAILABLE

- **CONSULTING SERVICES**

Expert advice, thought leadership and critical thinking that demystifies the mission critical business operational path forward for you.

- **ENERGY EFFICIENCY**

Delivering innovation and proven energy efficiency technologies to significantly reduce and optimize your electrical and mechanical HVACR systems load.

- **ENGINEERING INNOVATION**

Helping you to connect human ingenuity to technology innovation to achieve a higher standard of project design and deployment excellence.

- **PROJECT MANAGEMENT**

Delivering on your project goals, resources, and schedule.

ENERGY EFFICIENCY TECHNOLOGY SOLUTIONS THAT WORK FOR YOUR BUSINESS

Millennium Energy Consultants provides unique energy efficiency and Internet of Things (IoT) Cloud based solutions to help business entities of all types to directly address their most complex and challenging energy management, systems optimization, and operations and maintenance difficulties. Millennium Energy Consultants has the proven industry experience, technical skills and a holistic mix of energy efficiency technologies required to assist your building with extracting the maximum energy and operational savings from existing electrical and mechanical facility operational assets, restoring existing energy consuming HVAC/R systems back to their original manufacturer design specification ASHRAE and AHRI standards, and layering these services with a 24x7 performance monitoring center (PMC) call center that is always monitoring your facility for operational anomalies or fault detection even when you may not be.
